Dear IPUMS-Europe and IECM users,

We are pleased to communicate to you that we are organizing our third IPUMS-Europe/IECM workshop “Integrating European Census Microdata” that will be held in Barcelona on July 9-11, 2008, within the framework of the next European Population Conference organized by the European Association for Population Studies (EAPS). The EAPS committee has accepted a full session on demographic application of census microdata. In this respect, we invite you to submit proposals to participate in this session. Proposals should consist of an extended abstract or, preferably, a full paper to be sent before November 16th by email. Papers should be written in English –the working language at the meeting. Authors will be notified of their acceptance no later than December 1st.. Unfortunately, due to budget and conference limitations only four papers will be selected.

This call is addressed to all registered users that are affiliated to a European institution, have applied for European microdata and whose research has a clear demographic dimension. Hotel, meals and plane ticket expenses of the meeting attendees will be covered by the IECM project.
